

Research Handbook of Accounting and Organisational Change Call for Chapters

Editors: Lino Cinquini*, Maria Serena Chiucchi[§], Marco Giuliani[§], Andrea Tenucci*

* Scuola Superiore Sant'Anna, Pisa, IT

[§] Università Politecnica delle Marche, Ancona, IT

Synopsis

This Research Handbook is aimed at advancing approaches, models, and purposes of accounting to face the rise of new informative needs in business, both for external communication and for internal use. The focus will be on the accounting and organizational change driven by recent social, environmental and technological phenomena, such as globalization and sustainable development, digital technologies and disruptive global events (such as pandemic and war).

Thus, this handbook will deal with some of the most relevant contemporary topics concerning the change of accounting and its use for producing information both to external stakeholders and for managerial decision making and control.

The focus on both the internal and external perspectives is needed because the boundaries between these two perspectives on the making and use of accounting information are becoming more and more blurred. In this respect, the book will suggest theoretical and practical issues pertaining to both aspects and explore the related emerging and interrelated topics in accounting open to academic research and practice.

Areas & topics of this Call for Chapters

Areas and topics of interest are mainly referred (but not limited) to the following:

Change in business

- *New methodologies and theoretical approaches to investigate accounting*
- *Business model innovation and accounting*
- *New competences, skills and role of the accountant*
- *The rising of 'hybrid' accounting*
- *Accounting in supply chains*
- *Accounting for strategy and resilience*
- *Impact of the pandemic on accounting*

Digitalization

- *Digitalization, new technologies and accounting*
- *Big Data and accounting*
- *Artificial Intelligence, Machine learning and accounting*
- *Performance measurement in digitalization and accounting*
- *The digitalized accountant*

Sustainable development

- *The new role, contents and objects of accounting for sustainable development*
- *Accounting for ESG, SDGs and Sustainable Development*
- *Accounting for measurement and control of sustainability*
- *Evolution in Business reporting and accounting*
- *The role of accounting respect Corporate Sustainability Reporting Directive*
- *Accounting for a sustainable supply chain*
- *Opening up accounting in the Anthropocene: climate change and biodiversity*

The suggested topics are not considered specific of an area but could also intersect multiple areas.

An **International Workshop** sponsored by SIDREA (SIW) will be organized within 2023 (first half), where a special track linked to this Call will be planned to submit, present and discuss extended abstracts or full papers. This will provide the opportunity for Authors to have feedbacks by the Guest Editors and finalize the submission to the Handbook.

The deadline to submit the Chapters is **31st December, 2023**. Submissions will be subjected to a double blinded review process.

The publication of the handbook is scheduled by the end of **2024**.

Submissions should be sent to all the Guest Editors (e-mails below).
