Room: Auditorium Building: U12

## Climate change disclosure and responsible investments strategies

Many asset owners, including pension funds and insurance companies, index providers, rating agencies and asset managers are starting to take even greater into account the integration of environmental, social and an evolved corporate governance system (ESG) by which it is possible to measure companies performance. Such organizations and entities are focusing their attention on those companies whose management involves a positive impact on climate change currently under way, organizations that adopt decarbonisation strategies and they pay attention to renewable energy and are not due to high greenhouse gas emissions ( GHG).
